Summary

Social media lead with 6 years in digital marketing and Web3 since 2022 (following crypto since 2017). I build social functions from zero and scale them: strategy, tone of voice, analytics and teams of 5–10 people. Led social for an ecosystem with 30M+ followers at Blum, where one educational post drove 300K+ wallet connections. Comfortable leading a team or owning channels hands-on – the product matters more than the title.
